

Enroll in Our New Online Courses

SPA 223: Language Development

SPA 416: Research Methods in Communication Sciences

Offered through the Miami University Department of Speech Pathology and Audiology

SPA 223: Language Development

May 20 – June 27, 2014

This course examines both scientific and theoretical knowledge about normal language acquisition from birth to adulthood.

For more information, contact Dr. Geralyn Timler: timlergr@miamioh.edu

SPA 416: Research Methods in Communication Sciences

May 20 – June 27, 2014

This course examines common research methodology and analysis in the area of communication sciences and disorders. Communication disorders include, but are not limited to stuttering, speech sound distortions, delayed language development, communication impairments from stroke or traumatic brain injury.

For more information, contact Dr. Kathy Marron: hutchik@miamioh.edu

What is Speech Pathology?

Speech-language pathologists evaluate and diagnose speech, language, cognitive communication, and swallowing disorder and treat disorders in individuals ranging from infants to elderly. For more information about this important profession, visit www.asha.org.

If you are interested in applying to a Master's program in Speech Pathology, these courses are prerequisites for admission to many US graduate programs. To learn more, contact Dr. Susan Brehm at **513-529-2553** or spa@MiamiOH.edu.
