Miami University
Oxford, OH**

Featuring a performance by the Miami University Best Buddies Choir

Artwork created by local artists with disabilities from The Cloverbrook Art Gallery and the Inside Out Art Studio will be on display and available for purchase in the Office of Diversity Affairs.

Steve Silberman's groundbreaking and New York Times best-selling book "NeuroTribes: The Legacy of Autism and the Future of Neurodiversity," is a compassionate and comprehensive history of the science and culture of autism. Silberman upends conventional thinking about autism diagnoses and suggests a broader model for acceptance and understanding. His presentation unearths the secret history of autism while also discovering surprising answers to the crucial question of why the number of diagnoses has soared in recent years. Silberman explores the need for a more humane world in which people with learning differences and those who love them have access to the resources they need to live happier, healthier, more secure, and more meaningful lives.
